English

Support is available to individuals dealing with substance abuse issues. Group Therapy is led by specialized clinicians and provides opportunities for in-depth discussions around the complexity of addiction, its underlying causes, and the essential elements to maintaining sobriety.

Peer support is essential to recovery so we offer individual and group counseling sessions facilitated by Peer Recovery Support Specialists who have completed their peer certification.

Peer Recovery Support Specialists are embedded in our substance use and/or mental health treatment programming. Peers are individuals with lived substance use and/or mental health experience who serve as role models, advocates, and support to those in treatment. Peers encourage pro-social behaviors and activities and assist clients with linkages to recovery resources.
